

## What we have been doing...

### SUCCESSFUL RECRUITMENT

We are excited to report that we have wrapped up recruitment and initial testing for the main study. Over the past year, we visited over 200 children in their homes or schools across the UK. We look forward to analysing all the data we have collected so far!

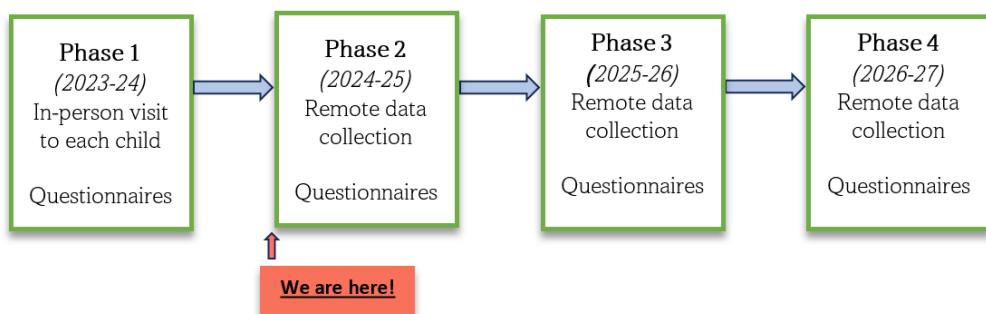

### JO WON AN AWARD!

Jo was awarded the Neil O'Connor Award from the British Psychological Society Developmental Psychology Section in September, for a previous study of minimally verbal children. Here she is giving a prize lecture!

## What's happening next...

Preparations are underway for Phase 2 of the project, which involves remotely following up each child one year from their entry into the study.
