

# Project ISLaND April Update

## Conferences:

Between the 22<sup>nd</sup> and 25<sup>th</sup> of April, we attended the annual meeting of the International Society of Autism Research (INSAR) in Prague.

We presented posters on:

- Predictors of caregiver wellbeing
- How family genetic risk factors shape the profiles of MV children
- Whether the Autism Symptom Dimensions Questionnaire (ASDQ) works for MV children

We also had the opportunity to connect with other researchers who are working in this area. In addition, we attended a range of insightful talks, gaining new ideas for methods and statistical approaches to use in our future work.

## Publication progress:

We're excited to announce that our paper on *caregiver wellbeing* has been accepted for publication in the Journal of Autism and Developmental Disorders (JADD). Look out for a written and video summary of our findings in the coming weeks.
